EXECUTIVE CERTIFICATE TRACK

Management and Leadership

As organizations move away from a “command and control” model to a more “cultivate and coordinate” model, executives can no longer rely on old ways of thinking about leadership strategies.

This course is built around MIT’s unique Distributed Leadership Model—an innovative and impactful approach to executive leadership. Tested in diverse, real-world settings, the model allows managers to succeed as leaders by being flexible and adaptive in new and unexpected ways through the application of the 4-Cap+ Leadership Framework.

Developed by Faculty Director Deborah Ancona and her colleagues at MIT, the 4-CAPS+ Leadership Framework provides key insights into the skills required for effective leadership and makes it possible to harness, align, and leverage the leadership capabilities that exist throughout an organization.

To help you apply these insights to your own leadership, the program includes a personalized x360 leadership assessment and a one-on-one coaching session following the course—giving you a clear picture of your leadership strengths and development areas, and a plan for putting them into practice.
